Brevard Achievement Center & Codecraft Works Fibonacci Program
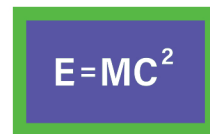

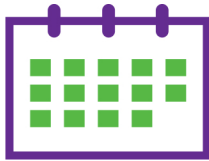

Fibonacci Phase I

The collaborative sixteen-week Fibonacci Program, consisting of two segments, between Brevard Achievement Center and Codecraft Works is the practical marriage of technical skills and soft skills necessary to maintain a successful career. Participants will learn the basics of coding with HTML and JavaScript. They will also become certified in Google Analytics and utilize these skills to analyze a Corporate Partner's website. Additionally, Pre-Employment Training to further foster these professional relationships is available for students who haven't taking this program, providing twenty hours of Pre-Employment Training to further foster these professional relationships.

Phase 1 Schedule:
